# KAYLA

To Sam, the howling of the wolfhounds at the edge of his Canadian town evokes memories of his father, who disappeared with his sled dogs on a polar expedition. To the townspeople, the dogs are killers of livestock and deserve to be killed themselves.

When Sam befriends a husky he names Kayla, the pressure to destroy the dog strains Sam's family, but also brings him closer to his stepfather.

As Sam helps Kayla adapt to civilization, Kayla rewards him with loyalty and bravery - and even wins over the townspeople by leading Sam's sled to victory in the annual dogsled race.
